

Regarding Proceeding No. 13-86

To whom it may concern:

It really comes as no surprise to me that a move to relax regulation on nudity and profanity would be requested. I would like to submit my opinion that any changes to such regulation should not be changed. If they are to be changed, please consider tightening existing regulations. Such content (nudity, foul language, etc.) does not add anything meaningful to society. Instead, we are assisting our youth (and adults alike) in becoming less respectful toward people in general. It is bad enough that there is an abundance of profanity in private programming. We need not contaminate publicly aired programming any further. Thank you for your consideration.

Gregory Hill
